1. Complete Beckett Burners are not covered by this warranty unless prior authorization from Beckett has been received. An RMA is required before returning any complete burner.
2. Damages caused by fuel are not covered by this warranty. Users should only use ASTM D396 for #1 and #2 heating fuels or ASTM B6-B20 fuel if product label confirms compatibility. If the use of other fuels is required, please consult with Beckett for written authorization. The use of unapproved fuel may cause equipment failures including leaked fuels which can cause ground contamination. Equipment failure can lead to property damage, personal injury or death due to carbon monoxide poisoning, fire, or explosion. Please refer to burner rating label to avoid mis-fueling.
3. Non-Beckett branded products should be returned to that manufacturer’s home office in accordance with their warranty terms. Non-Beckett branded equipment sent to Beckett will be returned at customer’s expense or scrapped. **Please consult with the manufacturer listed on the product for applicable warranties**
4. These Items are intended to be replaced during routine servicing and are not covered by this warranty.

To place a claim under this warranty: Beckett branded products should be returned freight prepaid, to Beckett’s home office. At Beckett’s discretion, credit or replacement will be provided to the Customer unless the returned product is determined to be free of defect, outside of the warranty period listed and/or damaged through misuse or neglect. In this case the equipment will be returned at the customer’s expense or scrapped.
